National Institute of Technology (NIT) Jamshedpur <i>B.Tech. in Electronics and Communication Engineering — 7.62 CGPA</i>	July 2019 — May 2023 <i>Jharkhand, India</i>
Cambridge School, Nalanda (CBSE) <i>12th Grade — 76%</i>	May 2017 — April 2019 <i>Bihar, India</i>
PTJM Saraswati Vidya Mandir, Nalanda (CBSE) <i>10th Grade — 9.8 GPA</i>	May 2009 — April 2017 <i>Bihar, India</i>

WORK EXPERIENCE

Software Engineer Intern <i>Yellow.ai</i>	January 2023 — June 2023 <i>Bangalore</i>
<ul style="list-style-type: none">Worked as Full-Stack Developer for Platform-Services Team which aims for the company's growth by handling Authentication, Subscription, No man's Land problems, and Platform Resiliency.Assigned to build a Conversational Interactive Chat-Bot on Yellow.ai's platform on the use-case of "Hotel & Restaurant Management," implementing features for booking hotel rooms in specific cities with flexible dates and room types, as well as ordering food from available cuisines with a variety of dishes. Used JavaScript in the customization of the bot.Contributed to the live "Audit Logs" project following SDLC rules, designing a React-based Single Page Application (SPA) UI and integrating it with backend APIs to track all the actions performed by users of all the roles in different modules.	
Entry-Level Frontend Developer <i>Kohli Media LLP</i>	March 2021 — May 2021 <i>Punjab</i>
<ul style="list-style-type: none">Worked as Frontend Developer on a "Conferencing Website (IFER)" project utilizing HTML, CSS, & JavaScript.Developed & enhanced the UI & UX of the IFER project and designed email templates using HTML & Inline CSS.Designed a website template for the company using HTML, CSS, and JavaScript.	

PROJECTS

Audit Logs	April 2023 — May 2023
Implemented a new feature in the Account Panel of the cloud.yellow.ai platform so the users can go through all the actions being performed on the platform, by platform users on a bot-specific level.	
<i>Tech Stack used: React.js, Redux, TypeScript, Tailwind CSS, Ant Design, Elasticsearch, API Integration</i>	
<ul style="list-style-type: none">Designed a SPA UI, displaying the latest logs in reverse chronological order reflecting the Action Name, Module, User Email, User Role, and Timestamp in a Table, and Action Description & Detail in an expandable row.Implemented search and filter functionalities, enabling users to quickly find specific actions by Action Name, Action Detail, Module, Email, or Timestamp.Enhanced the user experience by enabling the download of filtered logs in CSV format, providing users with a convenient way to analyze and review platform activity.	
Bookaddicts	July 2022
It is an open-source website for Bibliophiles, basically a community of book lovers.	
<i>Tech Stack used: HTML, CSS, Bootstrap, EJS, Express.js, Node.js, MongoDB, Passport.js</i>	
<ul style="list-style-type: none">Users can recommend and sell by adding their books to the website for free.Work like a social media platform to add or, delete comments on a particular post.Allow users to purchase a book directly from the owner through the contact info provided on the site.Implemented user authentication and authorization, so the users must sign-in/sign-up to manage their posts and comments on the platform.
